

HOW TO PREPARE FOR THE OFF-SITE INSTALL

Make Your Space Ready for Install:

Your space must be prepped before your appointment. To ensure timely turnaround, it's important that your space is ready for install.

Our shop's fast schedule relies on getting projects completed within their specified timelines.

Space must be prepped accordingly:

To avoid additional fees or delays, please prep your space by ensuring the surfaces are clear and furniture and objects are out of the way. If you have existing vinyl, wall paper, or adhesive on the surface, please make sure to have it removed prior to your appointment.

Remember, a wrap is only as good as the surface you put it on.

If Your space Is NOT Install Ready. We will have to charge you a wasted trip fee of \$500 or a cleaning fee of \$100/hr. Yes, \$500 is a lot for no work to be completed, but our installers have a very busy schedule. A wasted trip or additional cleaning will cause our deadlines to be pushed for your project and our other customers.

Day of Install & Pre-Inspection:

Your big day is finally here! Our team of expert installers are ready to transform your space. After you've cleaned and prepped your space, and gotten it ready on time, it's time for pre-inspection.

Before we start the install we must perform a Walk Around Inspection. One of our amazing team members will inspect the space and note any; damage, improper install surfaces, areas that may include work outside of the work quoted, etc.
